Air Quality - AIR <i>Mitigation Measure AIR-1:</i> The project applicant shall ensure that construction plans include the BAAQMD Best Management Practices for fugitive dust control. The following will be required for all construction activities within the project area. These measures will reduce fugitive dust emissions primarily during soil movement, grading and demolition activities, but also during vehicle and equipment movement on unpaved project sites: <ol style="list-style-type: none"> a. All active construction areas shall be watered twice daily or more often if necessary. Increased watering frequency shall be required whenever wind speeds exceed 15 miles-per-hour. b. Pavement, apply water three times daily, or apply non-toxic soil stabilizers on all unpaved access roads and parking and staging areas at construction sites. c. Cover stockpiles of debris, soil, sand, and any other materials that can be windblown. Trucks transporting these materials shall be covered. d. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited. e. <p><i>Mitigation Measure NOI-3:</i> Mitigation of outside noise is based upon windows that are closed in order to provide the required noise protection. Therefore, all units must have a ventilation system that provides a habitable interior air quality environment with the windows closed, regardless of outside temperature. In addition, noise levels produced by heating and air conditioning units for the project must not themselves create a noise problem for any of the residential units associated with the project or adjacent properties.</p>	<p>Prior to Issuance of Building Permit & Review of Installed Materials Prior to Final</p>	<p>City of Campbell</p>	<p>Building Division</p>	<p>Statement by Acoustical Consultant</p>
