## **NOTICE OF UPCOMING SEWER CONSTRUCTION ACTIVITY**

West Valley Sanitation District has contracted with Insituform Technologies to rehabilitate the sewers along the streets shown on the back of this notice. This work is scheduled to begin on September 7, 2021 and last approximately three months. Rehabilitation of the sewers will increase the reliability and extend the life of this critical piece of infrastructure.

The rehabilitation process will not require excavation. However, equipment will need to be parked over and around sewer manholes for a continuous 36-hour period. During this period, street parking may be restricted, and temporary traffic lane closures or detours may be required. “No Parking” signs will be posted 72-hours in advance of work.

Access for emergency vehicles, garbage collection, in addition to access to driveways will be maintained throughout the sewer rehabilitation process. Interruptions to your sanitary sewer service are not required. However, you may be requested to reduce the amount of water you place down the drain to help facilitate the rehabilitation work.

Additional notifications will be distributed to affected residents and businesses two weeks and 72-hours in advance of construction activities in your immediate area.

For any questions regarding this notice or during construction please contact:

Oscar Molina-Superintendent  
Insituform Technologies  
(562) 413-1594
